

Food supplement with ingredients
for the **skin and hair**.

Strawberry Mango
refreshing taste

Skin's conditions¹

**Normal formation
of collagen²**

**Wheat ceramides
and astaxanthin**

Healthy hair³

5 Types of Collagen
I, II, III, V, and X

**Protects against
oxidative stress⁴**

**Normal functioning
of the immune system⁶**

**4Life Tri-Factor
Formula⁵**

NUTRICOSMETICS

4LIFE TRANSFER FACTOR™ COLLAGEN™ TRI-FACTOR™ FORMULA

- (1) It contributes to the normal formation of collagen for the proper function of skin.
- (2) Vitamins A, C and Biotin help to preserve skin's normal conditions.
- (3) Biotin promotes healthy hair.
- (4) Vitamins C, E and Biotin protect cells against oxidative stress.
- (5) Made from Colostrum and egg yolk.
- (6) Vitamins A, C and Biotin contribute to the normal functioning of the immune system.

DID YOU KNOW THAT...?

The skin is the largest organ in our body. It occupies 1.5-2 m² and represents almost 7% of the total weight of the human body. The skin is made up of three layers:

Epidermis:
outermost layer

Dermis:
middle layer

Hypodermis:
innermost layer

The dermis is made up of collagen fibers, among other structures. Over the years, the production of collagen is reduced, and the skin loses firmness, hydration, the appearance of fine lines and wrinkles. Hair growth also takes place in the dermis. Taking care of our skin and hair begins inside of us. There are specific nutrients that foster their proper conditions. Plus, great allies would be healthy habits such as a balanced diet, proper hydration, getting enough sleep, stress reduction, and, last but not least, regular physical exercise.
